

Fact Sheet

Gwinnett County Public Library

Hamilton Mill Branch

ART IN ARCHITECTURE

The *Art in Architecture* motif, designed by local artist Maria Artemis, condenses themes of water, earth, sun, and the use of language in our culture. The artist created a series of screened glass 'paintings' for windows throughout the library. The "Art in Architecture" element provides customers the opportunity to either passively or actively interact with their library. The Hamilton Mill library branch is one of the first public buildings in the community to introduce this feature.
